

Social Narrative:

My Field Trip to the Museum of Science and Industry

I am going to the
Museum of Science and Industry
for a field trip.

On my field trip,
I will explore the Museum.
I will learn new things.
I will have fun.

Lots of kids come here for field trips.
I'll start my day in the Group Center
with many other students.

It may be loud in here.
Everyone is excited!

Lots of people work at this Museum.
They wear lab coats, bright shirts
and name tags.

Museum workers are friendly and fun!
They can answer my questions.
They can also help me if I get lost.

I will leave my lunch bag in the Group Center. This is where I will come back to eat lunch today.

I can get a Museum map in the Group Center. This map will show me where everything is in the Museum.

In the Museum, it's important to stay safe. These people work here. They are here to help.

When I'm in the Museum,
I will stay with my adult.

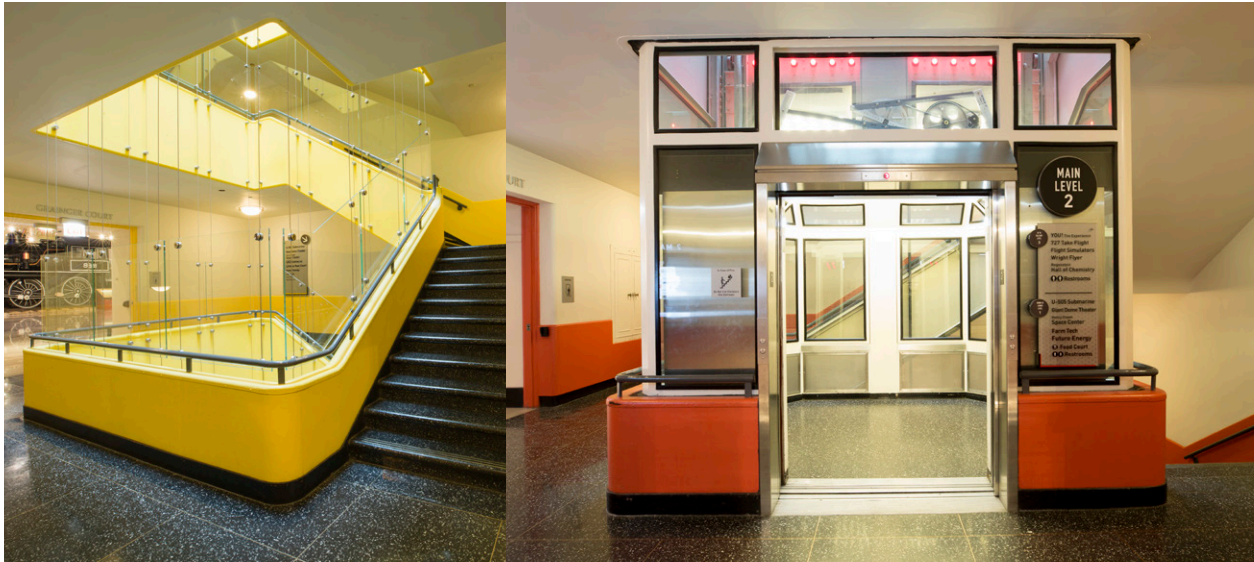

There are loud noises in the Museum sometimes.

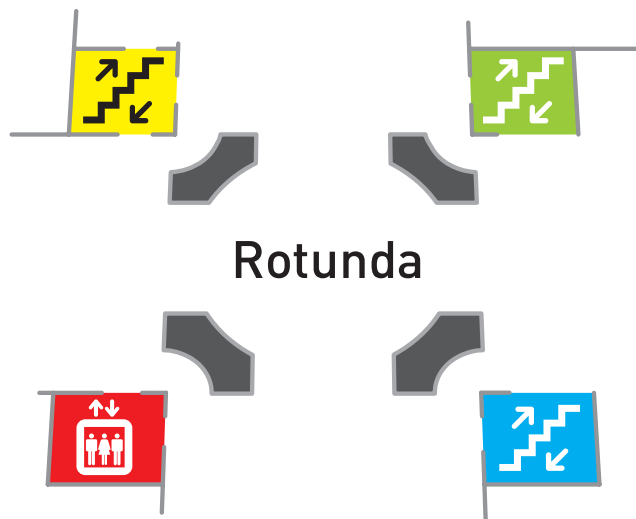

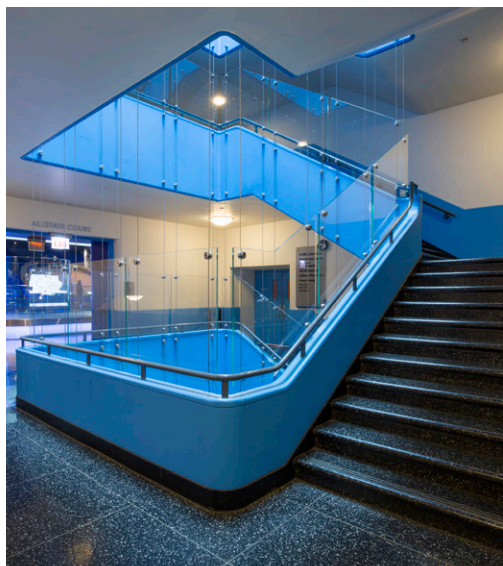

Some of the exhibits are loud but I'll hear lots of people talking.

In the Museum, I can use elevators, escalators or stairs to move around.

The staircases all have different colors. You can see those on the map.

The Museum is very big with many things to see.

I may see trains, planes
or old cars.

I may see a real Coal Mine!

The Coal Mine's whistle is very loud.
It's OK to cover your ears when
you hear it.

I may see baby chicks.

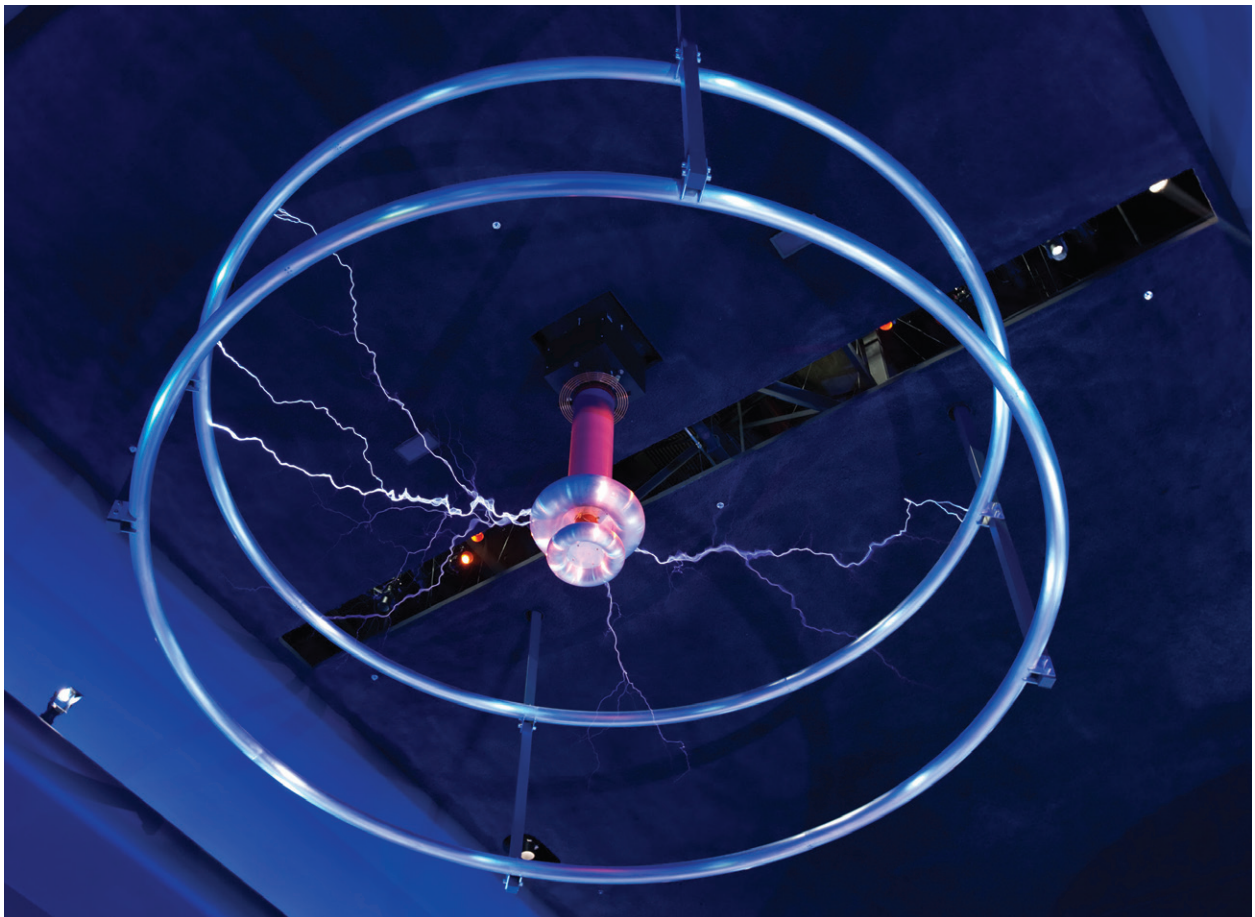

The baby chicks are very cute but I can't touch them. The chicks are very happy in their Museum home.

I may see a giant tornado
in Science Storms!

I won't be scared.
This tornado is safe.
It was made for the Museum.

There is also a Tesla coil on the ceiling in Science Storms.
I'll see lightning bolts come from the Tesla coil.

The coil is very loud
when it goes off!

Sometimes, exhibits change.
It's fun to see new things!

If I need to find a quiet space today, I can ask my adult.

They can take me to the Information Desk to find out where there is a quiet place for me.

I'll see so much today, but the Museum is big. I won't be able to see everything!

It's OK to save some exhibits for another day.

When I visit the Museum of Science and Industry, I will explore many exhibits and learn a lot about science.

I can't wait to visit this Museum again.
